

Installing the Map

1. Map Description

The 2D gameplay map has two sides, each running different functions.

This side is used for garbage sorting, color block sorting, and color block stacking functions.

Other gameplay modes, such as color block grabbing, stacking, and fixed motion gripping, require this side.

2. Map Installation

Remove the two suction cups on the front of Dofbot, then align with the holes on the map, pass through the suction cups, and lock the suction cups to secure them in place, as shown in the figures below:
