Create an API

Course Content

- Register an account and API-KEY with a model service provider using your email or phone number to obtain access to cloud-based model services.

💡 Tip

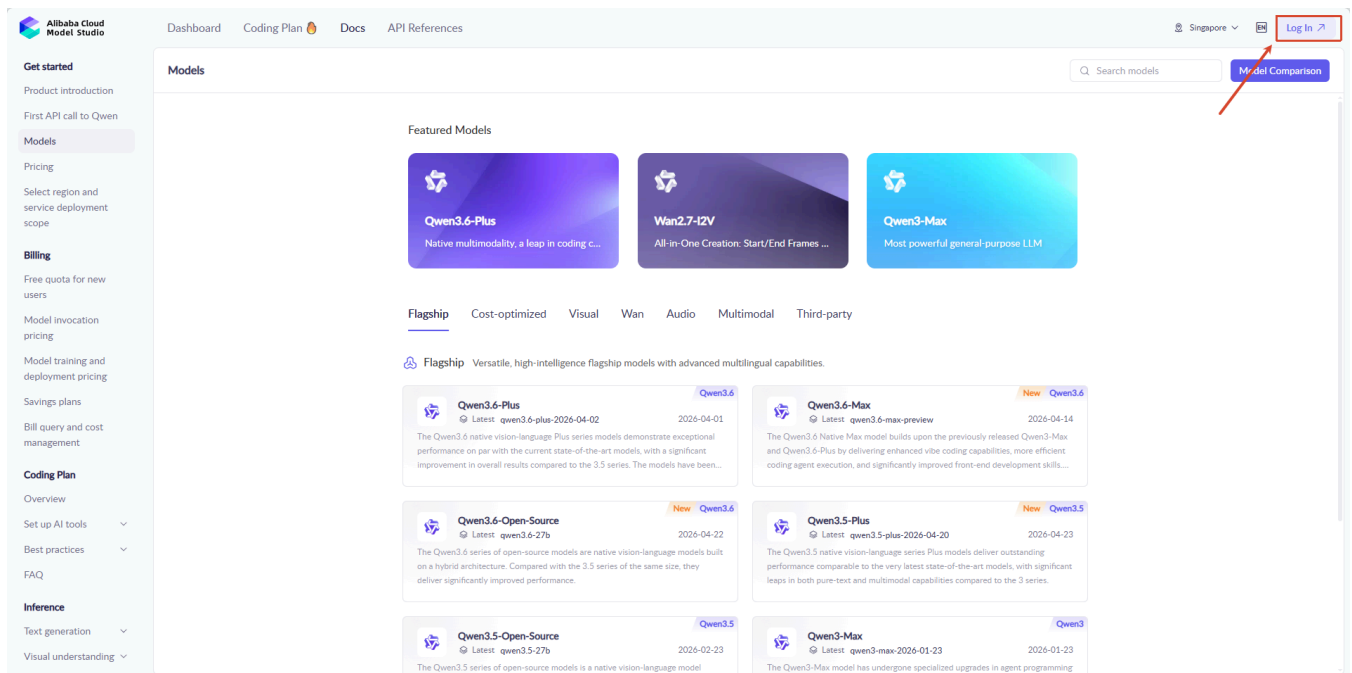

- This tutorial is for users who are registering a model service platform account for the first time. If you already have accounts with some model providers, you can skip this section.

Register Alibaba Cloud Model Studio Platform Account

Alibaba Cloud Model Studio Platform

International site address: [ModelStudio Console](https://modelstudio.console.aliyun.com/)

- Click **Log in** to register an account

- Select "individual Account" for registration

Sign in to Alibaba Cloud

Account

Password

[Sign in with Github](#)

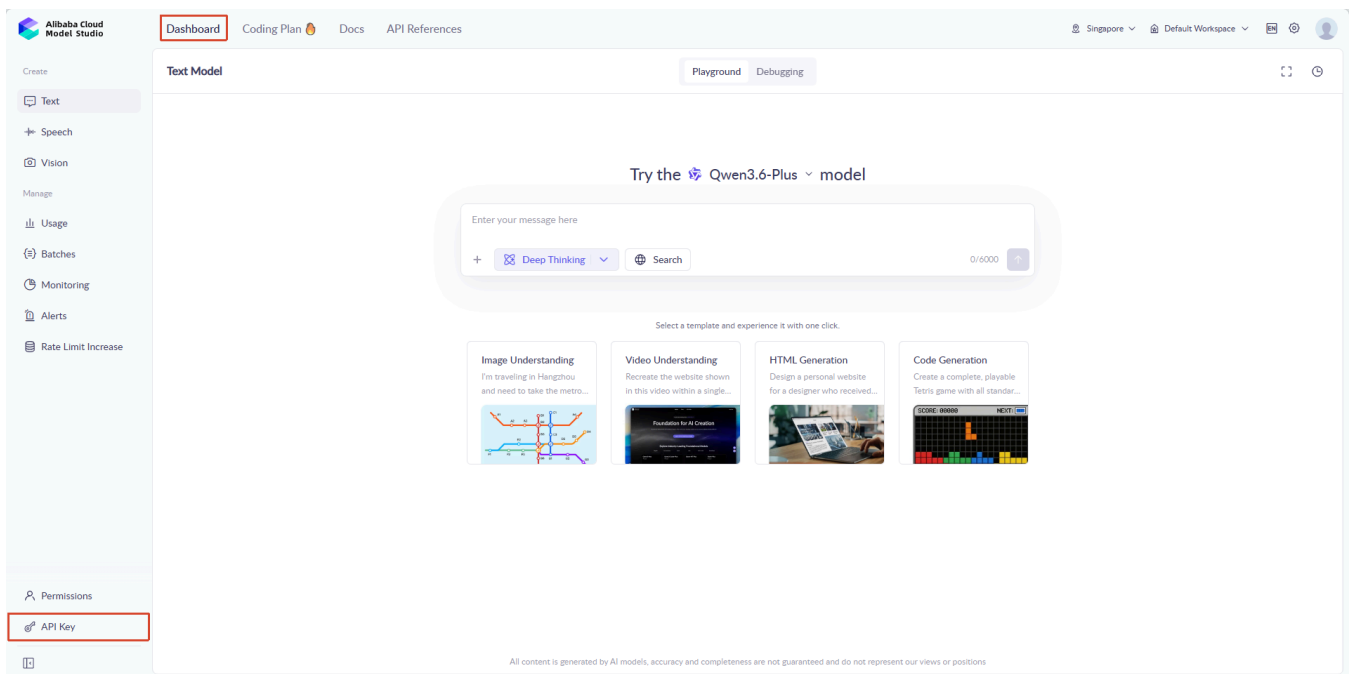

New to Alibaba Cloud? [Sign Up Now](#)

[Forgot Password](#) or [Other Sign In Difficulties?](#)

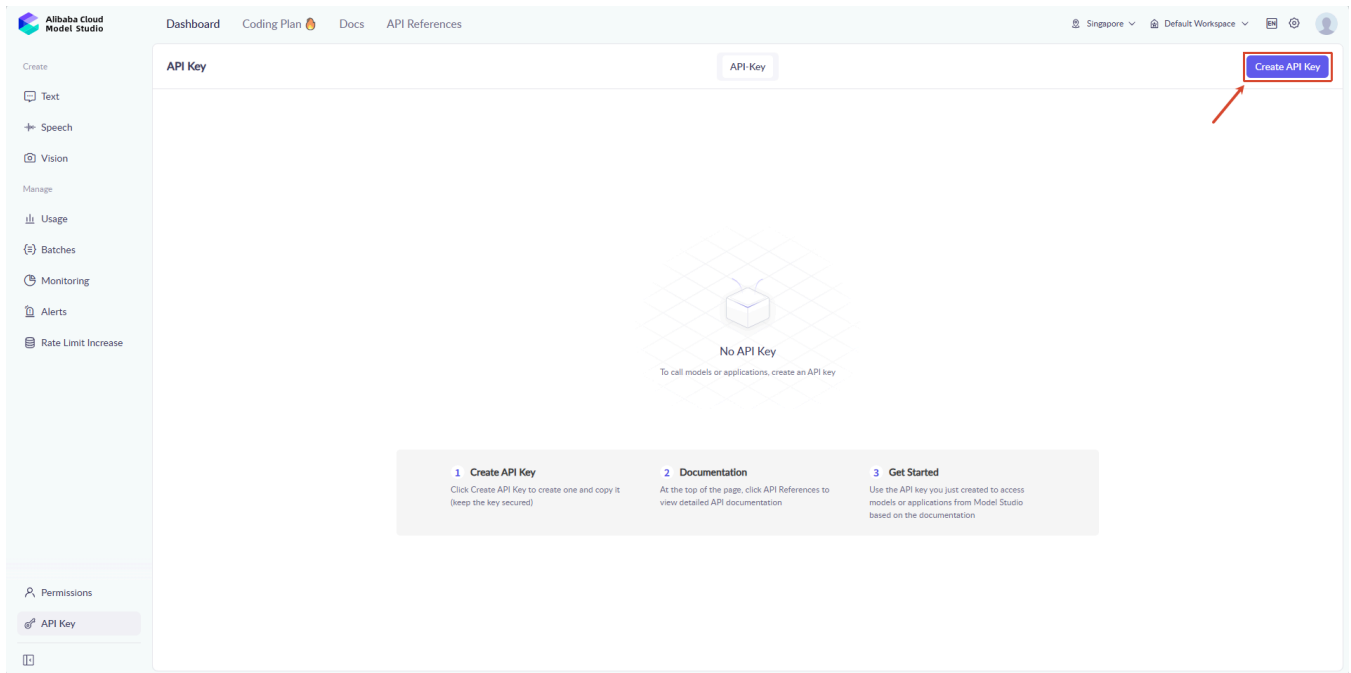

- Return to the Alibaba Cloud Model Studio homepage, refresh and click "Agree" to complete the registration of the Alibaba Cloud Model Studio Platform.

- Then click Dashboard and select API Key from the left navigation bar

- Click Create API Key in the upper right corner

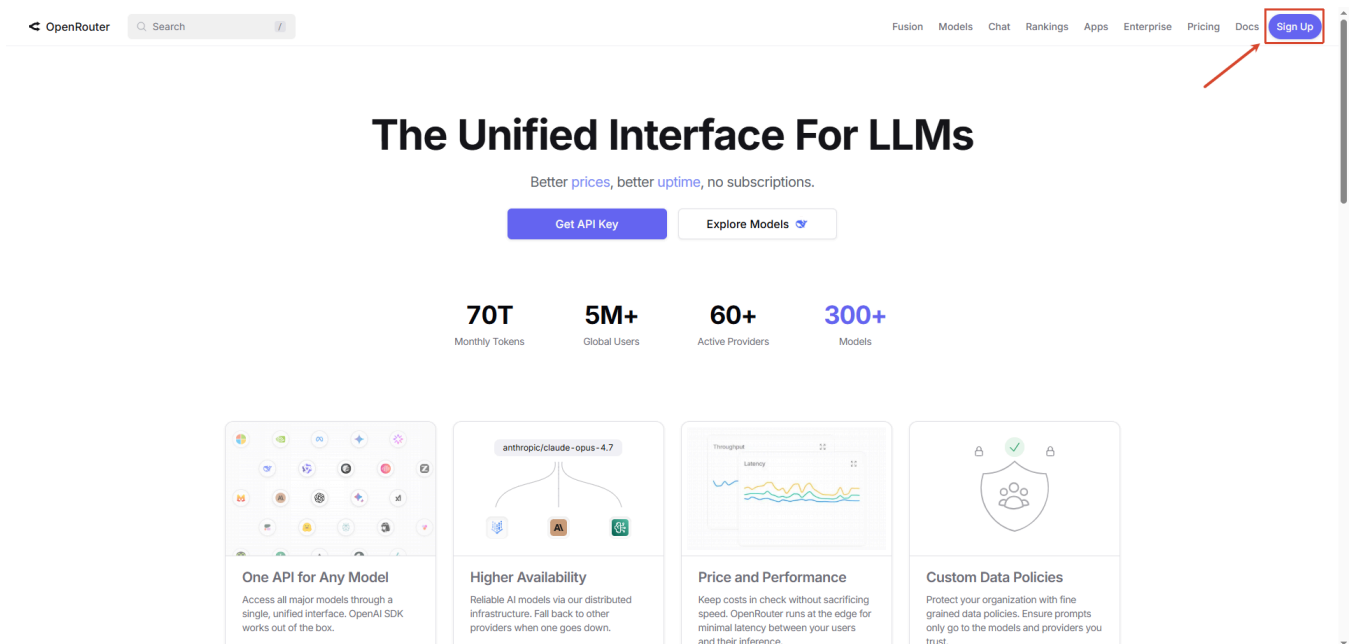

Openrouter Platform Account

Note

- Openrouter provides many free model services, but with access frequency limits and varying comprehension capabilities among free models. To ensure a better experience, it is recommended to prioritize using Alibaba's Bailian model services. This section is only for reference for users who need to use openrouter services.

Register an Account

Open the [openrouter](#) link and click the avatar in the upper right corner to register an account. Use your email to register - the process is similar to the above and will not be repeated here.

Create an API

- Click Get API Key to create an API

OpenRouter

Models

One API for Any Model

Access all major models through a single, unified interface. OpenAI SDK works out of the box.

Higher Availability

Reliable AI models via our distributed infrastructure. Fall back to other providers when one goes down.

Price and Performance

Keep costs in check without sacrificing speed. OpenRouter runs at the edge for minimal latency between your users and their inference.

Custom Data Policies

Protect your organization with fine grained data policies. Ensure prompts only go to the models and providers you trust.
