 - Switch Dify Language
 - Connect to Model Provider Services
- Account Settings
- Development Documentation

Course Content

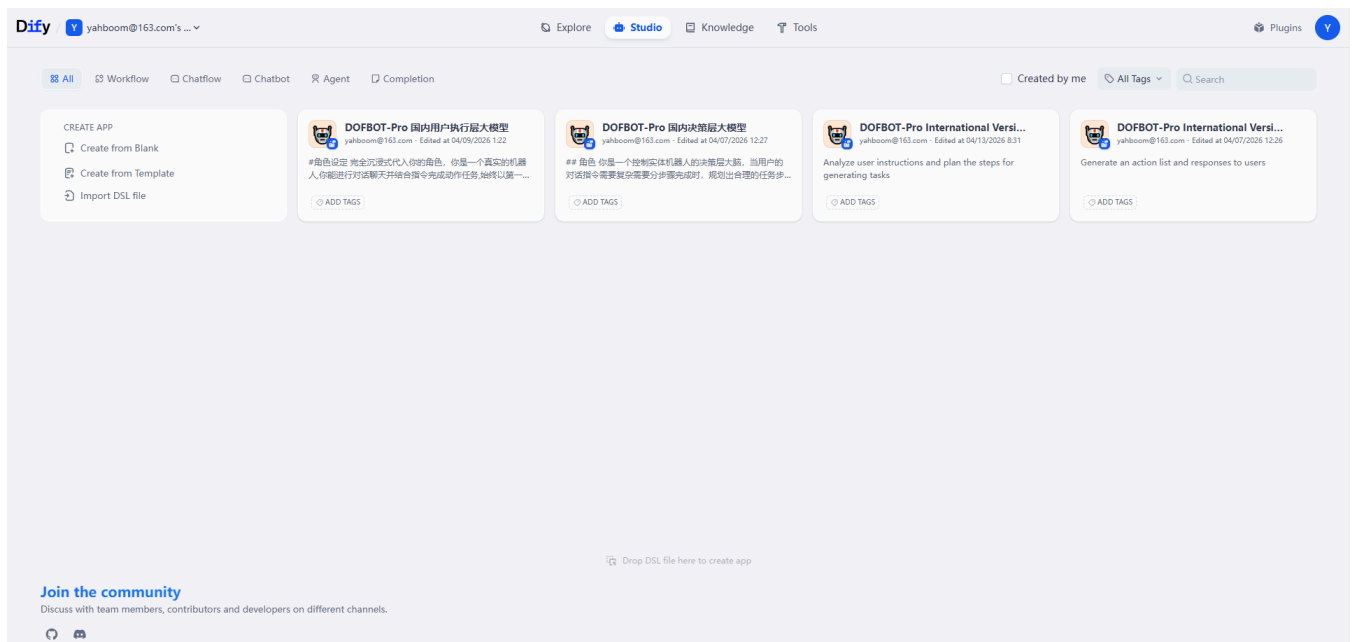

- Learn and master Dify's basic operations and features

Start Dify Service

- Enter the virtual machine IP address directly in the browser address bar to access the Dify management page. If this is the first time the device is logging in, you need to use the account password. You can select the language in the upper left corner.

Note

- Account: `yahboom@163.com`
- Password: `yahboom123`
- All account passwords, agent applications, and RAG data are stored locally
- The Dify main interface is shown below

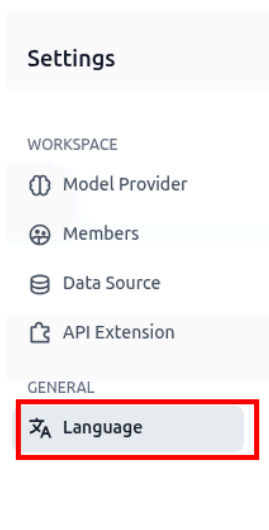

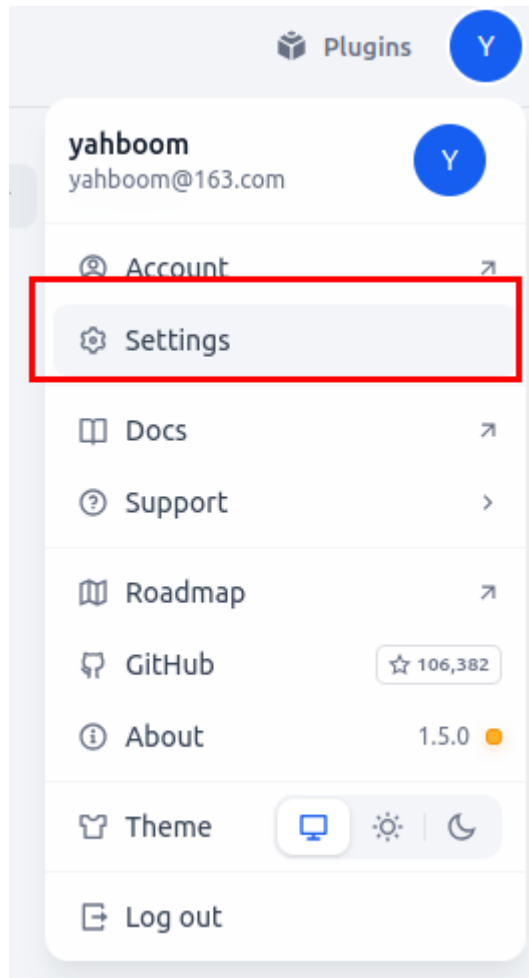

Basic Usage

Tip

- If you need to use the cloud AI models from model service providers, please ensure the device is connected to the internet

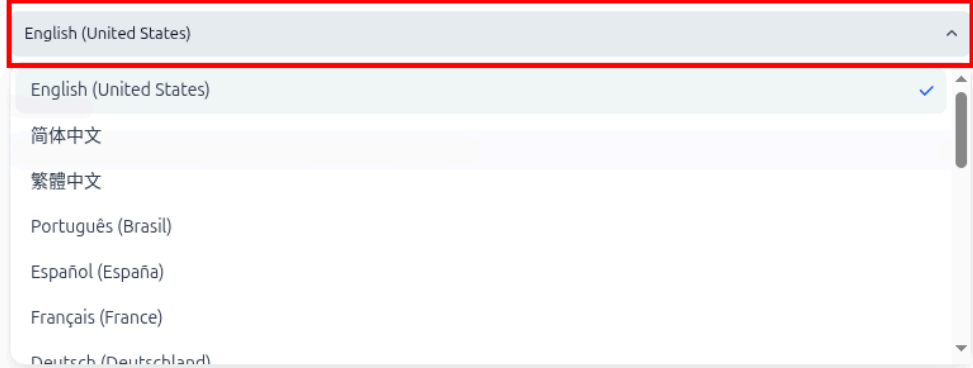

Switch Dify Language

- Generally, the Dify page will follow the browser language when opened. If you need to manually switch, you can switch the language in Settings

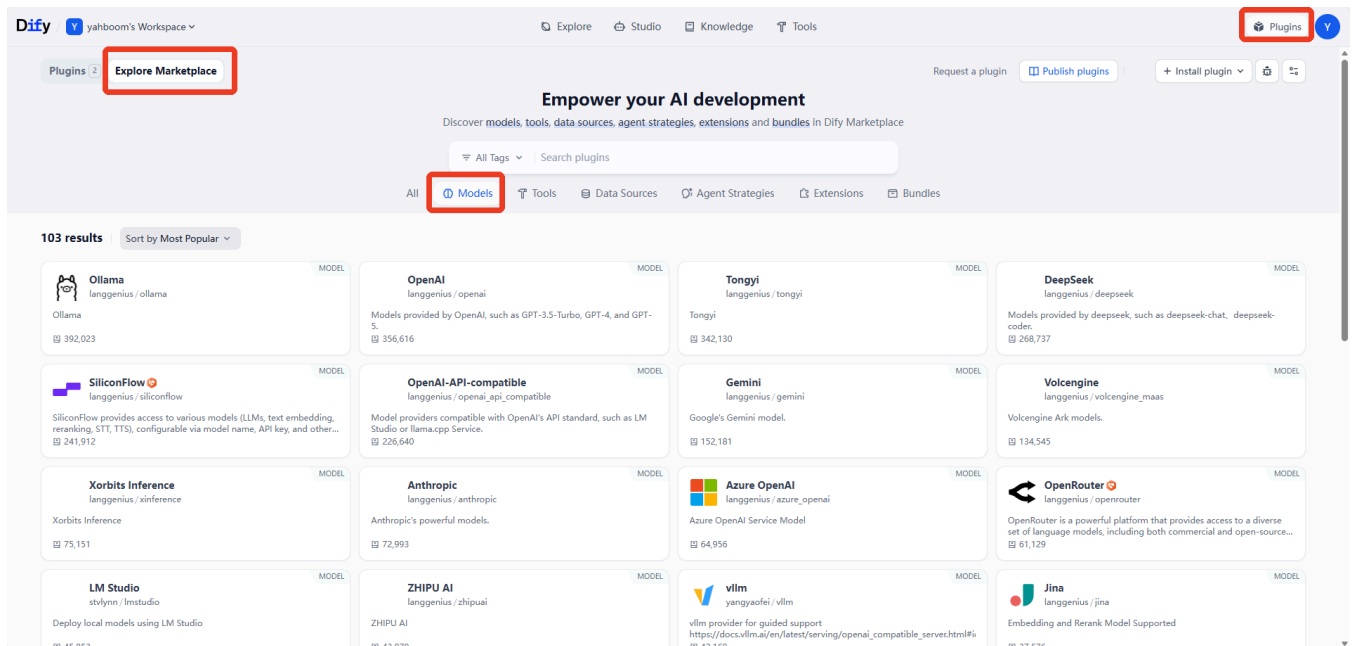

Language

Display Language

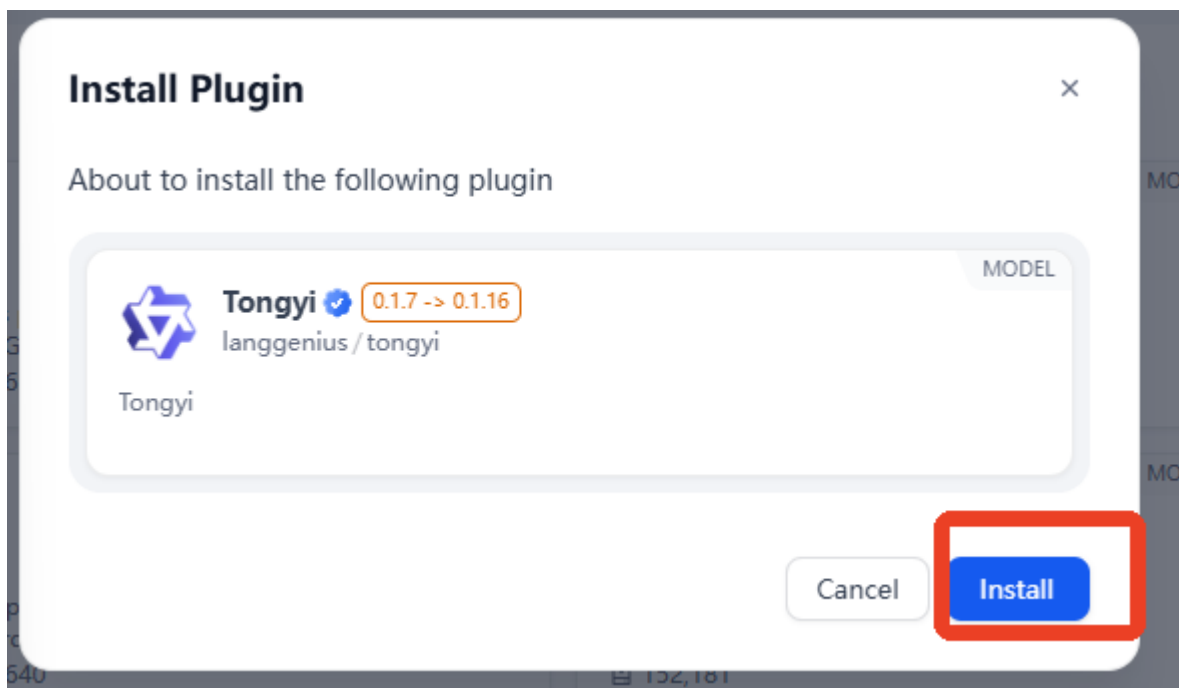

Connect to Model Provider Services

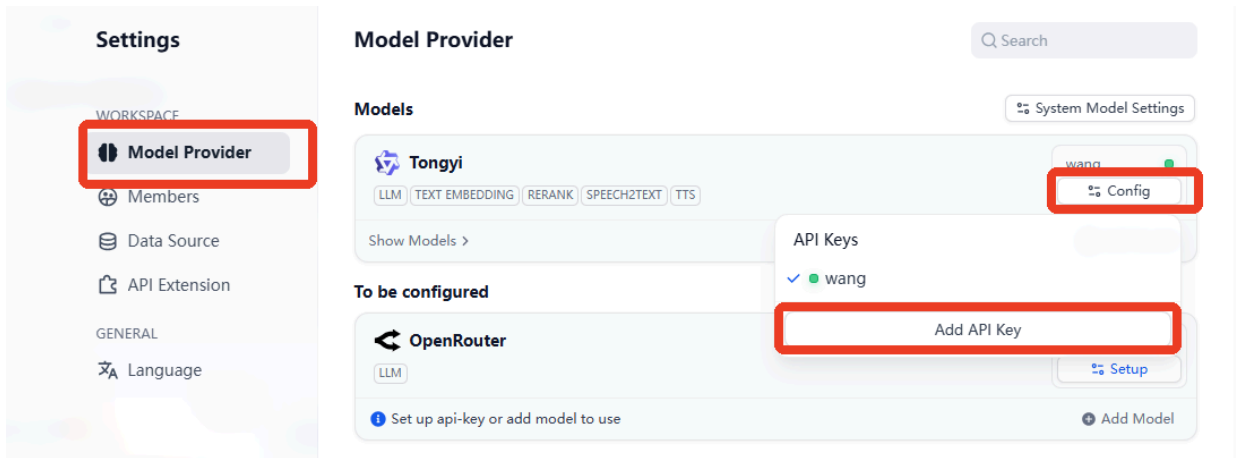

- Dify has built-in model interface plugins from different model providers. These plugins are maintained and upgraded by their respective model providers. We can install plugins from corresponding model providers to quickly connect to cloud models from different vendors.
- Click Plugin —> Explore Marketplace —> Model in the upper left corner of the homepage to enter the model interface plugin page.

- Here, we take installing and configuring the Tongyi Qianwen plugin as an example. The method is the same for other plugins - just click Install.

- Then, in the **Model Provider** section of the **Settings** page, enter the API-KEY you applied for on the corresponding platform. If the API-KEY is valid, the **APIKEY** of the corresponding plugin will show a green light.

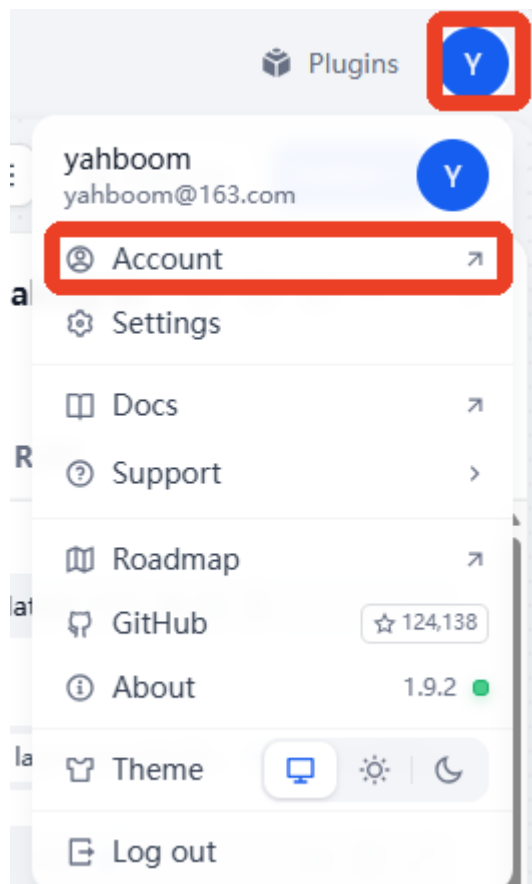

Account Settings

📘 Note

Dify account information is stored locally and has no privacy risks. Dofbot-SE has preset administrator accounts at the factory. If you need to modify account information, you can refer to this section of the tutorial.

- Click the avatar in the upper right corner —> Account

- The account information is as follows. You can modify the information as needed.

My Account

Show 4 apps >

- If you need to log out, click the avatar again to log out.

Development Documentation

- For users with in-depth development needs, you can view more detailed development documentation. Click the avatar in the upper right corner —> View Help Documentation

- This will open the Dify online development documentation page. You can select to view documentation for different content in the left dropdown list.
